DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to an integrated upholstery piece of a backrest and deck subassembly, classified in class 297, subclass 218.1.
 - II. Claims 11-15, drawn to the framework of a backrest and deck subassembly, classified in class 297, subclass 452.63.
 - III. Claims 16-21, drawn to a sofa, classified in class 297, subclass 440.23.
 - IV. Claims 22-24, drawn to an armrest, classified in class 297, subclass 440.11.
 - V. Claims 25-33, drawn to a method of constructing a sofa, classified in class 297, subclass 440.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are related as combination and subcombinations.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination of the sofa does not require the hooks on the armrest, the integrated upholstery piece with a zipper along side the panel or a pair of slats attached to the fabric sheet. The subcombinations have separate utility such as an integrated upholstery piece on an

automobile seat, hooks on an armrest for an office chair, and a pair of slats on display shelf.

3. Inventions I-IV and V are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process can be used to make a materially different product such as a bed frame or office chair.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and the search required for each Group I-V are not required for the other Groups I-V, restriction for examination purposes as indicated is proper.
6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
